Customer Journey Map

This Customer Journey Map explains the complete experience of a student or learner while using EduGenie, the Google Gemini Powered Learning Assistant. It shows what the user does, how they interact with the system, what they think and feel during each step, who manages each process, and how the experience can be improved.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	• Opens EduGenie web interface. • Selects a learning mode (Explain, Q&A, Quiz, Summarize or Learning Path). • Types the question or topic and clicks Submit.	• Waits while the system processes the request. • FastAPI routes the request to the correct AI module. • Google Gemini AI generates the educational response.	• Views the AI-generated answer, quiz or summary. • Uses the explanation to understand the concept better. • Can ask follow-up questions or select a different mode.
Touchpoint <i>What part of the service do they interact with?</i>	• HTML + CSS Web Interface • Mode selection buttons • Text input box and Submit button	• FastAPI Backend • Google Gemini API • Module Router (explain, /quiz, /summarize, /learn)	• AI Response Display Area • Web Interface output section • Re-interaction input box
Customer Thought <i>What is the customer thinking?</i>	• I want to understand this concept clearly. • I hope EduGenie gives a clear and simple explanation. • This interface looks easy and simple to use.	• I hope the AI response is accurate and helpful. • The response should be quick and relevant. • I want detailed and clear information on this topic.	• This explanation is very helpful and clear. • I now understand the concept much better. • I will definitely use EduGenie again for my studies.

Customer Feeling <i>What is the customer feeling?</i>	• Curious • Hopeful • Interested	• Excited • Engaged • Confident	• Satisfied • Happy • Motivated
Process Ownership <i>Who is in the lead on this?</i>	• HTML + CSS Frontend	• FastAPI Backend • Google Gemini API	• Response Display Module • Web Interface
Opportunities <i>How can we improve this stage?</i>	• Simplify the input interface design. • Add topic suggestions and autocomplete. • Improve mode selection UI design.	• Improve AI response accuracy. • Reduce API response time. • Expand support for more subject topics.	• Allow saving or exporting responses. • Add quiz scoring and auto-evaluation. • Provide personalized learning progress tracking.
